Fisheries Review (ISSN 1042-6299) is intended to furnish indexing of current literature in fisheries research and management.

One volume, consisting of four numbers, is issued each year. Each number contains separate Author, Geographic, Taxonomic, and Subject indexes. Authors who publish in journals not screened for *Fisheries Review*, and who would like their publications included, should submit reprints or abstracts to the Editor.

The National Biological Survey assumes no responsibility for the accuracy of material from outside sources.

Fisheries Review

Vol. 39, No. 4 1994

Contents

AQUATIC PLANTS AND THEIR CONTROL 1

CULTURE AND PROPAGATION

General Fish Culture 1
Trout and Salmon Culture 2
Warmwater Culture 7
Mariculture 12
Feeds, Feeding, and Nutrition 15
Transporting Fish 22
Aquariums 22
Miscellaneous Culture Techniques and Equipment 24

LIMNOLOGY AND OCEANOGRAPHY

General 25
Physical 26
Benthos 26
Plankton 26

MORPHOLOGY, PHYSIOLOGY, GENETICS AND BEHAVIOR

Morphology 26
Physiology 32
Genetics, Variation Studies and Hybridization 55
Behavior 62

NATURAL HISTORY

Life History-General Works 68
Population Studies, Production, Recruitment, etc. 71
Spawning Habits and Movements, Fecundity, etc. 74
Movements, Seasonal and Depth Distribution, etc. 77
Foods/Feeding 80
Age and Growth 86
Geographical Distribution, Fish Surveys, etc. 87
Abundance, Factors of; Survival and Mortality 92
Identification, Keys, Classification 94

PARASITES AND DISEASES

General 96
Bacterial 97
Fungal 101
Protozoan 102
Viral 103
Other 105

POLLUTION AND TOXICOLOGY

Pollution 110
Fish Kills 112
Toxicology; Bioassays 112

RESEARCH AND MANAGEMENT

General 122

Administration and Planning 128
Reports of Fishery Stations, States, etc. 128
Habitat Alterations 128
Harvest, Creel Census, etc. 130
Regulations 131
Fish Control and Removal 131
Marking and Tagging 131
Stocking and Introductions 132
Fishing Gear and Techniques 133
Fishways, Fish Passage Through Dams, etc. 135
Mathematics, Statistical Methods, and Modeling 135
Lake Management and Research 138
River and Stream Management and Research 140
Farm Pond and Small Impoundment Management and Research 144
Large Impoundment Management and Research 144
Estuary Management and Research 145
Marine Management and Research 148
Utilization of Fishery Products 154
Misc. Techniques and Equipment 162
Reviews, Bibliographies, etc. 164
Miscellaneous 164

AUTHOR INDEX (Blue) 167
GEOGRAPHIC INDEX (White) 235
SUBJECT INDEX (Blue) 249
SYSTEMATIC INDEX (White) 335

BOOK REVIEW

Environmental Profiles: A Global Guide to Projects and People, by Linda Sobel Katz, Sarah Orick, and Robert Honig 166

FISHERIES BOOKS AND SYMPOSIA RECEIVED 477

LIST OF JOURNALS SCANNED 481

AVAILABILITY OF REPRINTS AND PUBLICATIONS

Fisheries Review does not distribute any of the papers cited herein, nor can the editor of *Fisheries Review* obtain copies of these papers for anyone. A reprint of an article published in a journal may be available from the author, from the organization with which the author is affiliated, or from the publisher of the journal in which the article appeared. When an author's address is known, it is shown in square brackets following the citation. Addresses of most wildlife organizations can be obtained from the Conservation Directory, an annual publication available from the National Wildlife Federation, 1412 16th St., N.W., Washington, D.C. 20036. This directory lists more than 900 agencies and organizations concerned with natural resources use.

Camera-ready copy for this issue of *Fisheries Review* has been generated by computer programs developed by the Bibliographic Information Branch, National Biological Survey, Information Transfer Center, 1201 Oak Ridge Drive, Suite 200, Fort Collins, CO 80525-5589.

As a cost-saving measure, a cumulative annual index will no longer be printed. However, a list of journals and serials scanned each year now is included in the final issue of each volume.

Fisheries Review Is Now Available On **Compact Disc**

BOOK REVIEW

Katz, Linda Sobel, Sarah Orick, and Robert Honig. 1993. *Environmental Profiles: A Global Guide to Projects and People*. Garland Publishing, Inc., 717 Fifth Ave.—Suite 2500, New York, NY 10022. xxvi + 1,083 pp. Available from the publisher at $125.00 (cloth).

This book was written "to produce a resource that actually describes how, why, and where environmental efforts have been undertaken and who provided the energy, impetus, and commitment to make them happen." The book features programs according to country and further organizes the information under federal or state government, nongovernment organizations, private entities, and universities. Each country's entry begins with a concise description of the country and the major environmental issues and actions being taken. The entries vary from just a few pages to more than 300 pages for the United States. Narrative entries include names and phrases in bold type, indicating that they are index terms [a spot check indicated the indexing was thorough and consistent]. An appendix further organizes material by listing organizations, projects, and individuals under designated issues such as "global warming" and "sustainable development."

An ambitious project such as this is bound to have flaws for those who look for them. For example, the way entries are organized in the section for the United States is confusing. There are omissions and inconsistencies; for example, there is an entry for only one of the seven U.S. Fish and Wildlife Service regional offices (the other six are not mentioned). The newest bureau of the U.S. Department of Interior, the National Biological Survey (established in November 1993), is not in the book; because some of the scientists featured in other entries now work for the Survey, some entries are already out of date. Some foreign universities with active natural resource programs are not mentioned. However, these are flaws only if one expects the book to be a comprehensive directory. It does not claim to be such, and those who try to use it as a directory will be frustrated.

Taken at face value—as a compilation of projects around the world—this book serves a purpose by highlighting successful approaches to global environmental issues and giving credit to some lesser-known "green heroes." At the least, it can enhance our awareness of environmental problems of staggering magnitude. The book is useful and interesting for the browser, and it is a valuable reference if used in conjunction with directories and data bases. I look forward to seeing what the authors will choose to include in their next edition.—Diana H. Cross, U.S. National Biological Survey, Information Transfer Center, 1201 Oak Ridge Drive—Suite 200, Fort Collins, CO 80525.

Fort Collins, CO 80525-5589

As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering the wisest use of our land and water resources, protecting our fish and wildlife, and providing for the enjoyment of life through outdoor recreation. The Department assesses our energy and mineral resources and works to assure that their development is in the best interests of all our people. The Department also has a major responsibility for American Indian reservation communities and for people who live in island territories under U. S. administration.
